

### QUICKLY MANAGE STORAGE RESOURCES

Compellent's Reporting Kit brings storage system management within reach. Customizable tools present storage system resources, consumption, and performance information in easily understood formats.

Comprehensive graphs present real-time and historical data to analyze trends. Quickly identify and maintain performance metrics; continuously optimizing availability.

### ACCURATE ANALYSIS AND CHARGEBACK

For many businesses, incomplete storage resource analysis results in poor financial control. With Compellent's Reporting Kit, large and small businesses alike gain control of these valuable storage resources. Accurate tracking and chargeback reports enhance capital planning.

### PLANNED PURCHASES

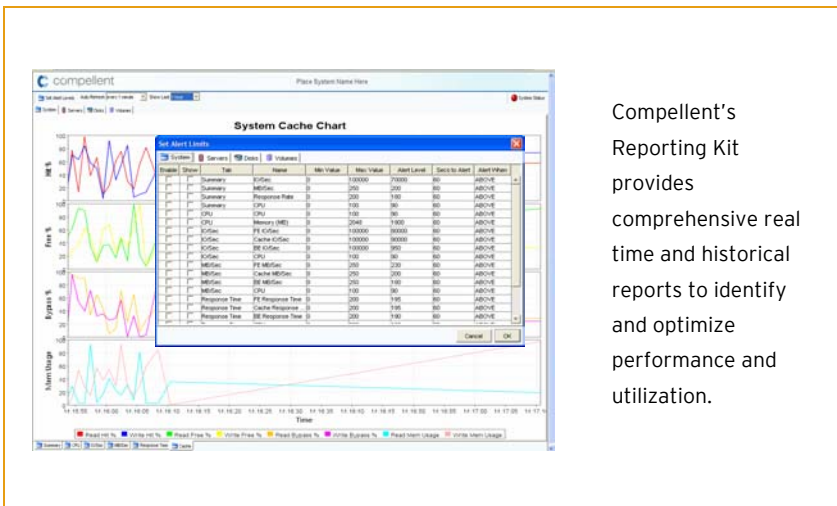

Improve storage and IT resources planning with performance management tools and accurate billing information. Reduce capital and operating expenses while improving system performance.

### Capabilities

- Visual representation of detailed performance and resource data
- Policy driven tools
- Real time and historical reports
- Predictive analysis
- Performance analysis
- Customized reports for Technical, Supervisory and Executive levels
- Single, comprehensive tool for all reporting and chargeback functions

### Benefits

- Maximize uptime and optimal performance conditions
- Accurately assess storage resource utilization and costs
- Manage more storage with existing staff
- Instantly view complete system status
- Enhance capital expenditure planning with trend reports
- Transition storage resources from overhead to a profit center
- Establish chargeback policies to department or user level
- Recover hidden expenses and reduce the cost for storage resources

Compellent's Reporting Kit provides comprehensive real time and historical reports to identify and optimize performance and utilization.

### THE COMPELLENT ADVANTAGE

- Web-based intuitive interface to quickly analyze virtually any system parameter over any time interval
- User defined high and low watermarks allow customization to the needs of your unique business
- Identify performance and capacity trends
- Chargeback reports transition storage resources from a cost center to a profit center

<b>System health</b>	Overall system health monitoring provides immediate status information
<b>Analysis intervals</b>	Both real time and historical analysis includes drill-down to specific time periods
<b>Device Analysis</b>	Monitor performance of individual servers, controllers, system cache and disk drives
<b>System capacity</b>	Identify total system storage capacity and utilization
<b>Performance metrics</b>	Overall bandwidth, system I/O, performance reports for servers, storage system, disks and volumes, with variable time period parameters
<b>Storage trending</b>	Identify storage trends including capacity consumption
<b>Internal service billing</b>	User defined policies for chargeback provide accurate accounting for storage resource
<b>Alert levels</b>	User defined minimum and maximum alert levels provide customizable alerts for every environment
<b>Exporting</b>	Historical information stored in exportable ODBC (Open Database Connectivity) compliant database

### About Compellent

Compellent delivers modular storage area networks (SANs) – exclusively through business partners – that every company can afford and any administrator can use.
